**METALIMPEX**

**your scrap**  
**is a resource**

recycling ferrous and non-ferrous metals

**suez**

# FOR 120 YEARS, **BOONE COMENOR METALIMPEX** HAS RECYCLED RESOURCES WORLDWIDE

It was in 1899 that Boone Comenor Metalimpex, based in the Hauts-de-France, developed its business of recycling scrap metal to become market leader in France today.

Now part of SUEZ Group, Boone Comenor Metalimpex has historical business expertise and proven know-how in scrap metal recycling.

Renowned locally as well as internationally, Boone Comenor Metalimpex cultivates a sense of proximity on all levels by developing close collaboration and branches worldwide.

Privileged partner of industrial production sites, our business concentrates on the needs of its clients for whom it collects, sorts and markets scrap metal as well as secondary industrial waste.

## **+** ADDED VALUE

We offer made-to-measure services from simple collection to a comprehensive in situ service with the aim of limiting impact on logistical, operational and environmental costs.

Whatever your establishment,  
BCM will support you

## **OUR CUSTOMERS**

## **+** KEY FIGURES IN 2016

**14** subsidiaries  
worldwide

present  
on **4** continents

**20** sites  
in France **+500**  
collaborators

**+1700000 T**  
sold in 2016

## AN EXTENSIVE COMMERCIAL NETWORK

Our presence on 4 continents gives us preferential access to world scrap metal markets.

To make recycling your scrap a smooth phase in your production chain, we implement all the best-in-class resources:

### ► commercial resources

Our experts monitor the fluctuations in the rates of metals in order to sell your scrap metal at the best prices available on the market.

### ► operational resources

Our operational teams are at your service to deploy the resources and means so that we can offer you a made-to-measure service.

Thanks to our logistic competences and our large fleet of industrial equipment we are in a position to adapt to every flow (road, river, rail, maritime) and operate efficiently and safely on your sites.

### ► technical resources

We design personalised studies for optimal management of flows in partnership with the subsidiaries of the SUEZ Group.

### ► administrative and financial resources

We shall support you in the implementation of your administrative procedures. Our teams are at your service to deal with all your requirements.

### ► specialised partners

We carry out demolitions, blow piping and gas cutting with our specialised partners.

**Just as many resources that will allow us to meet your needs efficiently at all times.**

## In situ service: made-to-measure management of your scrap metal

# OUR BUSINESS: TO OPTIMISE YOURS

The extraordinary things about recycling metal is that it allows for the creation of new material from material that has already been used, conserving 100% of its properties, indefinitely.

## BOONE COMENOR METALIMPEX, A COMMITTED COMPANY

- Guarantee of the management of the channels of ferrous and non-ferrous metals
- Focus on satisfying the expectations of the stakeholders, guaranteeing quality of the service, respect for the environment and health and safety protection
- An on-going interest in professional development thanks to our training, our quality and our hygiene and safety policies
- Promoting professional diversity and insertion of people with disabilities
- Guarantee of conformity of the services to the regulations of each country and the environmental norms, as well as application of SUEZ's own standards
- Guarantee of conformity of services to local regulations in the subsidiaries and the application of SUEZ standards

## OUR RANGE OF MATERIALS

Whether they are ferrous and non-ferrous, the materials processed by Boone Comenor Metalimpex are transformed into top quality products.

E8 new cutting loose, E5H steel turning, E42 cast iron turnings, steel categories E1, E3, E653 bundles, cast iron, stainless steel, copper, aluminium, bronze, etc.
